"THE CAR WITH A CONSCIENCE"

Model 42 Oakland

MODEL 42 five-passenger touring car is bound to create a deep impression before the season is far advanced. It embodies sound engineering principles and possesses enough meritorious innovations to distinguish it from the common type of touring car. The body has a number of daring lines which stamp it as an individual design, and the aluminum steps, shroud and V-shaped radiator give the car a dashing appearance.

THE NATURE OF THE CHILD
Lecture by Professor Arthur J. in the Farmers' Week Course, Tuesday, March 5th.

An interesting lecture was given by Arthur J. Jones, Professor of Education on "The Nature of the Child." The main points of the lecture were as follows: There is nothing as "the child." Each child is an individual of his own and is treated as an individual. The important thing in the treatment of child is not the incentive, reward, the punishment but what is brought into the child himself. The aim is to find what will bring the desired result in each child. While this is true and each child different, it is also true that children show certain resemblances and a few of these resemblances is helpful both teacher and parent. If we want characteristics, interests and attitudes are likely to appear in children we can prepare ourselves in advance. Hence there is a distinct direct advantage in studying the characteristics of children. There is frequently an increasing demand teachers shall prepare in advance their work with children by some formal study of child nature methods. It is strange that we do not recognize the value and even necessity for such a training not for teachers but for every young man. There are few places where young woman can secure the training and instruction which will prepare for intelligent motherhood. Youngsters With Pimples.
Dr. Dr. True

A mother asks me how she shall remove pimples and humors that disfigure her child's face. My answer is very simple, direct, because all such blemishes are the result of poisons in the system that should be carried off in the secretions, but are not. When anyone finds the skin becoming yellow, dry, scaly, or when blackheads, pimples or blotches appear, they should take my Dr. True's Skin Purifier for sure and sure. This is a most remarkable remedy. It is wholly vegetable and pleasant, but very effective. It corrects a wrong condition of stomach and bowels, and sets these important organs in healthy activity, so that waste and poisons are driven from the system. No mother need feel anxiety about her child's face if she will give my pleasant remedy a chance to remove the cause of them. And I urge anyone young or old, who is now enduring the embarrassment, to follow the same course. It will certainly correct the evil. I recommend, too, that they use Parker's 23-C Cold Cream on face and neck every night. In this way they will make the skin soft, healthy and free from all blemishes.

THE NATURE OF THE CHILD.
Lecture by Professor Arthur J. Jones
in the Farmers' Week Course, Orono,
Tuesday, March 5th.

An interesting lecture was given by
Arthur J. Jones, Professor of Education
in the Women's Section Thursday morn-
ing. The main points of the lecture
were as follows: There is no such
thing as "the child." Each child has
an individuality of his own and must
be treated as an individual. The im-
portant thing in the treatment of any
child is not the incentive, reward, or
the punishment but what is brought to

lem is to find what will bring about
the desired result in each child.

While this is true and each child is
different, it is also true that children
show certain resemblances and a study
of these resemblances is helpful to
both teacher and parent. If we know
what characteristics, interests and ten-
dencies are likely to appear in children
we can prepare ourselves in advance
and thus guide and direct more intelli-
gently. Hence there is a distinct and
direct advantage in studying the char-
acteristics of children. There is con-
sequently an increasing demand that
teachers shall prepare in advance for
their work with children by some pro-
fessional study of child nature and
methods. It is strange that we have
not recognized the value and even the
necessity for such a training not only
for teachers but for every young woman.
There are few places where a

Another asks me how she shall remove
pimples and bumps that disfigure her
child's face. My answer is very simple and
direct, because all such blemishes are the
result of poisons in the system that should
be carried off in the secretions, but are not.

When anyone finds the skin becoming
yellow, dry, scaly, or when blackheads,
pimples or blotches appear, they should at
once take my Dr. True's Elixir for stom-
ach and bowels. This is a most remark-
able remedy. It is wholly vegetable,
and pleasant, but very effective.

It corrects a wrong condition of stom-
ach and bowels, and sets these important
organs in healthy activity, so that waste
and poisons are driven from the system.
It's mother need feel anxiety about facial
blemishes on her child if she will give my
pleasant remedy a chance to remove the
cause back of them. And I urge anyone,
young or old, who is now enduring this
embarrassment, to follow the same course.
It will certainly correct the evil.

I recommend, too, that they use Park-

averages is that we may investigate
the cause of any very wide difference;
it provides a danger signal. The
growth of children is not uniform; at
certain times or periods there is a very
rapid increase in height and weight;
at other periods the growth is compara-
tively slow. During these periods of
rapid growth the boy and girl need
special care, physically and mentally.

The child brings with him certain ten-
dencies to act, to feel, to think. These
are nature's gifts. Some of these are
useful and should be developed; some
are harmful and should be suppressed;
the great majority need to be directed
into channels which will be helpful.
The task of the teacher and the parent
is to make use of these gifts of nature
for the best development of the child.

Children early show natural interests
of various kinds. Some of these which
are of special importance in the life
and development of children are curi-
osity, which is the foundation for all
scientific investigation, interest in
action, which is of such vital impor-
tance, interest in rhyme, the collecting
interest and the play interest. All of
these furnish abundant power and en-
ergy which, if turned into useful chan-
nels make for normal, healthy develop-
ment and lead to happy, useful lives.
The best attitude for the teacher and
the parent is not blind, unthinking re-
verence for the possibilities for good in
the child, nor useless, craven fear for
the tendencies to evil, but a calm, clear
understanding that within the child
are certain tendencies, very strong and
powerful, which if not properly direct-
ed may result in dwarfed, misshapen,
harmful lives, but which may be di-
rected by us into useful channels and
produce noble, efficient, productive
citizens.

WILL MAKES BABIES IM- MUNE TO TUBERCULOSIS.

An interesting experiment for the
purpose of creating immunity against
tuberculosis is being tried in Portland
under the direction of the Tubercu-
losis League of that city. Dr. William
C. White, director of the city health
department, is conducting the experi-
ment. Before definite results of the
work will be apparent. The experi-
ment is being conducted on the theory
that much of our tuberculosis is due
to bacteria in childhood. In view
of this fact, the League is aiming to
suppress the growth of every baby
born for the next ten years in the
North Side district of Portland. The
babies and their mothers will be taken
in charge at the birth of the infant,
and everything possible will be done to
increase the resisting power of the
child to disease and to make it thereby
immune to tuberculosis infection. The
theory of the Society is that by fol-
lowing the baby in the earliest period
of a child's life, the infant will, in
most cases, become immune to the dis-
ease with which heredity and environ-
ment may threaten it.

For Sale by W. E. BOSSERMAN,
Bethel, Maine.

NORTH HARTFORD.

Wilma Davenport and Marion Ste-
ven are at home for a two weeks' va-
cation from their school in Buckfield.
The brown tails are being picked in
this vicinity. They are not being found
very plentiful.

Mrs. Albert Packard is visiting her
sister, and niece in Lewiston for a
couple of weeks.

Mrs. and Mrs. Walter Parfar have
been on the sick list.

Mrs. Julia Thorne has been very sick
of the grip for the past two weeks.

The two little boys of Mrs. E. C.
Mason of Paris visited their aunt, Mrs.
Ellen Carver, a few days last week.

Mrs. John Noyes is gaining.

Mrs. A. F. Davenport, who has had pneu-
monia and been seriously ill, is on the
gain, which her friends are very glad
to hear.

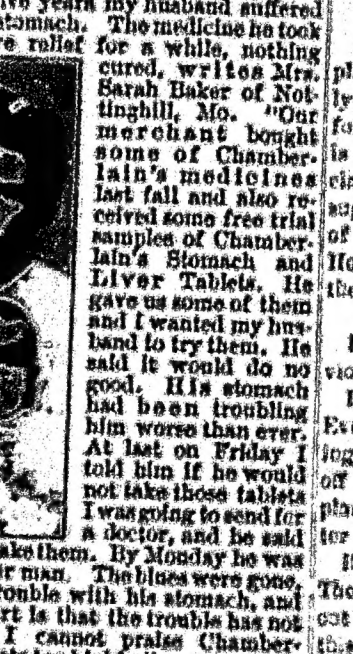

Mrs. Addie Goding, who has been
very poorly, is able to ride out again.
Mrs. Marion Bossey of Hibernia, who
recently lost her husband, has come to
make her home with her niece, Mrs.
Walter Gammon.

Traveling is very poor in this sec-
tion. The R. F. D. men goes with a
sleigh at this writing.

Edie Davenport has been caring for
her mother who has been quite ill, but
is gaining; she was able to come home
with her Friday to stay a few days.
Those who have trees tapped report
rather a poor spring on account of so
much rain.

How She Cured Her Husband

"For five years my husband suffered
with indigestion. The medicine he took
only gave relief for a while, nothing
cured, writes Mrs. Sarah Baker of Nor-
wich, Mo.: 'Dear Chamberlain's Colic,
Stomach and Liver Tablets. I bought
some of Chamberlain's medicine
last fall and also re-
ceived some free trial
samples of Chamber-
lain's Stomach and
Liver Tablets. I
gave some of them
and I wanted my hus-
band to try them. He
said it would do no
good. His stomach
had been troubling
him worse than ever.
At last on Friday I
told him if he would
not take those tablets
I was going to send for
a doctor, and he said
like another man. The samples were gone.
He was now troubled with his stomach, and
the best part is that the trouble has not
returned. I cannot praise Chamber-
lain's Tablets too highly.'"

WILL MAKES BABIES IM- MUNE TO TUBERCULOSIS.

An interesting experiment for the
purpose of creating immunity against
tuberculosis is being tried in Portland
under the direction of the Tubercu-
losis League of that city. Dr. William
C. White, director of the city health
department, is conducting the experi-
ment. Before definite results of the
work will be apparent. The experi-
ment is being conducted on the theory
that much of our tuberculosis is due
to bacteria in childhood. In view
of this fact, the League is aiming to
suppress the growth of every baby
born for the next ten years in the
North Side district of Portland. The
babies and their mothers will be taken
in charge at the birth of the infant,
and everything possible will be done to
increase the resisting power of the
child to disease and to make it thereby
immune to tuberculosis infection. The
theory of the Society is that by fol-
lowing the baby in the earliest period
of a child's life, the infant will, in
most cases, become immune to the dis-
ease with which heredity and environ-
ment may threaten it.

WEEDS AND HOW TO CON- TROL THEM.

Abstract of Lectures Given by Prof.
W. L. Blate, Jr. Farmers' Week
Course, Orono, Wednesday,
March 5.

It has been said that a weed is a
plant out of place. This is undoubtedly
true from certain standpoints, but
for the farmer, the weed is more-it
is a pest, an enemy, a source of finan-
cial loss. Recent experimentation
suggests that it is weeds, not the lack
of mulch, that lowers our corn crop.
However that may be, we do know that
they reduce our crop yields and values.

HOW WEEDS INJURE CROPS.

By using plant food. This is an ob-
vious fact that needs no explanation.
Every growing plant is constantly tak-
ing water from the soil and giving it
off through the leaves. A single corn
plant may use over 500 pounds of wa-
ter during its growing season.

By crowding out "vacuum" plants.
The case of "witch" grass "ran-
cing" other grasses, is an example of
this, and many others might be cited.
In consequence of harvesting, retooling
and use of crop, as weeds in hay, and
harvesting of fungus diseases, are some
of the other ways in which weeds in-
jure crops.

How we get weeds. It often occurs
that a new weed appears on a farm,
takes possession of whole fields, and
one is at a loss to know how it came
there. The most frequent sources are
our waste gardens, fence rows, road-
sides, and other waste places.
Weeds are allowed to run riot here
and are spread by the wind, like the
seed from higher lands, by animals
and birds. Some states have laws that
make it a misdemeanor to let noxious
weeds grow. With this in mind, we
have passed pure seed laws, so that a
purchaser may know when he is get-
ting pure seed or good.

Means of Combating Weeds. Tillage
is necessary. Better have less area
and keep it clean. Weeds have less
chance to get a start in this light.
Short rotations are necessary for
many weeds that tend to infect our
meadows.

Mowing and burning often are worth
while, but should be done before the
weeds form seed.

Spraying with herbicides is receiv-
ing considerable attention.
Sulfate and iron sulfate are being used
with success, but care must be taken
that the work is done thoroughly

**HEART THRILLING
GEMS.**

One day at a time—that's all it can
be.
No faster than that is the hardest
fate.
And days have their limits, however
we
Begin them too early and stretch
them too late.
One day at a time. It's a wholesome
rhyme—
A good one to live by; a day at a
time.
—Helen Hunt Jackson.

GUTHRIEMAN.
The others slept; he went apart
Beneath the garden trees;
The heavy burden on his heart
Had crushed him to his knees.

The mantle of the night was laid,
And silence fell around
Save where the brook of Cedron made
A little murmuring sound.

The son of God had traveled long
Upon a weary road;
The spirit that had been so strong
Was faint beneath its load.

His strength was ebbing fast away;
The light that led was dim;
He knew that those who would betray
Were coming there for him.

And thus he prayed: "O Father, let
The power that is Thine
Remove this bitter cup—and yet,
Thy will be done, not Mine!"

And lo! in answer to his cry,
As with a rush of flame,
From out the vaulted midnight sky
A radiant angel came.

The angel touched and made him
strong;
No more were loss and pain;
The way was right that had seemed
wrong.
And peace was his again.

What could it matter to him then
That they should seek him there—
A press of cruel, taunting men,
With a cross for him to bear?

It may be soon, it may be late—
That fateful hour when we
Shall pass within the garden gate
Of our Gethsemane.

And when we kneel to offer up
The agonized spirit's cry,
"O Father, take away the cup,
And let this hour pass by!"

Then may we humbly add, "Thy will,
And not my will, be done!"
Thus shall Thy peace the spirit fill,
And victory be won.
—John Chast. Minst. in the Youth's
Companion

AS TO YOU.
Did you give him a lift? He's a broth-
er of Man.
And bearing about all the burden he
can.

Did you give him a smile? He was
downcast and blue.
And the smile would have helped him
to battle it through.

Did you give him your hand? He was
clipping down hill.
And the world, so I feared, was closing
him in.

Did you give him a word? Did you
show him the road?
Did you just let him go on with the
load?

Did you help him along? He's a sin-
ner like you.
But the grasp of your hand might
have carried him through.

Did you let him go? Did you let him
go?
What was the most cruellest that fate
could do?

Did you leave him to turn to that
burden of care,
That is every man's load and that
every man shares?

Did you let him go? Did you let him
go?
Did you let him go? Did you let him
go?

Did you know what it means to be
tired?
When a lift just in time might set
everything right?

Did you know what it means—just the
clasp of a hand—
When a man's heart about all a man
ought to stand?

Did you ask what it was—why the
quivering lip?
And the glittering tears down the pale
cheek that slip?

Were you brother of his when the time
came to bat?
Did you offer to help him or did he
go on?

There's one more life the gift of a
brother of Man.

Mrs. Belle Sands, nee Fogg, has had
a large tumor removed recently. Dr.
Fitch attended her and accompanied her
to the Maine General Hospital, re-
maining until after the operation,
which he reports as successful.

Dr. Walker and wife were called to
Hiram two weeks ago, by the illness
of their son, Eddie, who was violently
seized with the grip and is now in a
critical condition.

John Paine and brother, Granville,
who have lived hermits for many years,
were found dead in their home the
10th. Natural causes are reported as
the cause of death. They had been
dead several days. One was on the bed
and the other dressed and apparently
trying to build a fire. It is conjectured
that the shock of his brother's death
caused him to asphyxiate, as he was in a
weakened condition.

A telephone is now being discussed
for West Brownfield.

Charles Hill, who recently had elec-
tric lights installed in his mill, is tak-
ing the advantage of them by running
day and night.

Mrs. Mary Nelson of Baldwin, who
recently lost her husband, is now with
her son, Charles Bennett, for an in-
definite period.

An accident on the Maine Central
was narrowly averted the 21st. A large
boxcar with tons of smaller stones

BETTER FARMING
means producing maximum crops with the least
expense and without impairing the fertility of the
soil. Lowell Fertilizers produce a profitable
crop and increase the fertility of the soil by supplying a reserve for
future seasons. They are composed of Animal Matter—Bone, Blood
and Meat—to which has been added potash in the proper proportions
to make a perfectly natural plant food that is active all the time.

"WILL CONTINUE TO USE LOWELL FERTILIZER."
I am very much pleased with Lowell Animal Fertilizers. I had about 4,000
barrels of potatoes in a single 15 acres of ground, not as large as I have had in
any year, but larger than the average grower has had that past season, which has been
very wet and backward.
I expect to use your goods as long as you make them as satisfactory as in the
past.
Write for our new booklet. It's full of information and will be sent
upon request. If we are not represented in your town, write for terms.

The darkest days of husband and wife are when they come to look forward to a childless and lonely old age.

Many a wife has found herself incapable of motherhood owing to some derangement of the feminine system, often curable by the proper remedies.

In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal.

If you want special advice write to Lydia E. Pinkham Medicine Co. (Confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman and held in strict confidence.

SUNDAY RIVER.

Mrs. Fred Mundt of Greyer Hill called on her sister, Mrs. H. M. Kendall, the first of the week.

Quite a number of the young people from this place attended the moving pictures at Bethel, Friday evening.

Leander Long and Aubrey Atwell, who have been working around here for some time, started for their home in Nova Scotia, Monday.

Bradford Costin visited friends in this place the latter part of the week.

C. A. Baker has two teams hauling dowsels to Bethel.

Howard Bailey went to Grafton with four horses Friday with a load of supplies and returned Sunday.

Mr. and Mrs. James Reynolds, who have been working for Lawson Atwell for the past few months, got through last week, and came out of the woods.

Mr. Reynolds purchased the farm known as the Jackson place of J. J. Spinney.

J. A. Spinney is quite sick at this writing.

Mrs. Margaret Mundt, who has been visiting friends and relatives in this place, returned to her home on Grover Hill the middle of last week.

Mr. Mason called at J. J. Spinney's one day last week.

Alfred Hobbs is boarding J. A. Thurston's mill crew.

Lewis Spinney, who has been logging in Grafton, came out of the woods last week.

W. G. Emery, who has been logging at Richardson Pond, returned home Saturday.

Alfred Long is staying at H. M. Kendall's.

J. W. Reynolds is working for C. A. Baker.

A dear little girl has come to gladden the home of Mr. and Mrs. R. M. Bean.

Y. A. Thurston came up this river April first with a load of supplies for the drive.

STOPS THAT CRAVING

"I had taken one other well-known 'cure' twice, and although it took six weeks each time to fix me up, there was always that terrible burning desire for drink. I now have no craving or appetite any more than if I had never known the taste of it. Part of the letter of a man whom we freed in THREE DAYS from his habit."
